## A Smart Cross-Platform App for Providing Information to Citizens
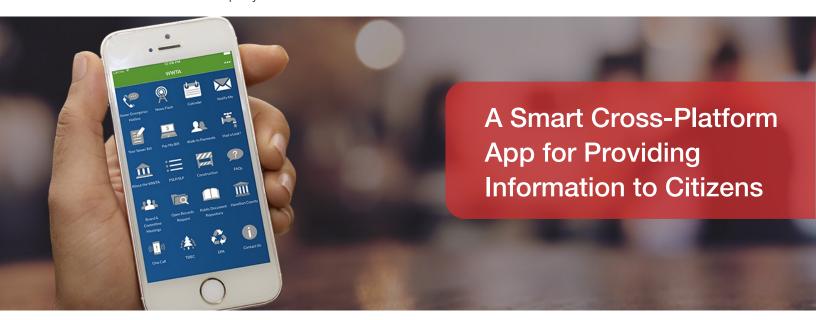

## Client Business Description

◇ An INC. 5000 fastest growing company. Headquartered in Manhattan, USA

◇ Into web development business specializing in building city and county e-government communication systems.

## Challenge

◇ Connects municipal employees and elected officials with citizens they represent using portfolio oflocal government solutions.

◇ Need for a solution that connects the city with its citizens and visitors, and provide access to community news, events, and emergency alerts.

## Idea

◇ A survey states that 77% of Americans now own smartphones, making access to real time information easy

◇ To cater to the problem, plan to develop mobile app for citizens and visitors that can be used to have access to all the information that the government shares.

## Our Solution

◇ Developed a cross-platform App (Civicmobile), that can run on iOS and Android platform,to connect city with its citizens or visitors.

◇ **Features considered were:**

- ○ News – Receive official news about the local area.
- ○ Calendar – See what's going on in the county and sign up for event notifications and changes.
- ○ Emergency Alert – Receive notification about important community news, street closures, road conditions, and critical emergencies.
- ○ Community Directory – County contacts and resources numbers.
- ○ Employment – Job openings and application process.
- ○ Online Payment – Convenient Online Payment for Water, Property Tax, Real Estate Tax, and Dog Tags. And much more!

### Technologies Used

- Phone gap
- Ionic/Angular Js
- Visual Studio Code Ide
